### Calculation and Reporting of Results

All rates were calculated by CSS following NCQA specifications. The number of valid responses collected this year for each measure (n, or measure denominator) is reported in parentheses.

### Rate Comparisons and Statistical Significance Testing

Comparisons to prior-year and benchmark rates were calculated prior to rounding and rounded for display. Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the comparison rate are marked with a ✓ symbol.

### Health Plan Ratings (HPR)

Estimated HPR stars for applicable measures, calculated by CSS based on the 2021 (MY2020) NCQA Quality Compass national benchmarks, are **UNOFFICIAL** and displayed for reference only. Final HPR stars will be calculated by NCQA and released in September of 2022.
